- Ensure that manufacturing processes run reliably and efficiently.
- Determine quality control standards.
- Organize workflow to meet specifications and deadlines.
- Monitor output, adjust resources and processes to reduce costs.
- Negotiate timelines as necessary for projects as they change in scope.
- Organize machine maintenance work.
- Ensure OH&S safety guidelines are followed.
- Regularly improve production processes and procedures.
- Provide motivation, support, and guidance to production staff.
- Develop workflow policies to ensure efficiency and productivity of assembly lines.

Skills & Experience:

- 5+ years' experience as a Production Manager.
- 2+ years' experience working in electronics.
- Qualification in production/manufacturing management.
- Or, qualification in business management with proven track record in manufacturing operations.
- Understanding of electronics.
- Excellent leadership skills.
- Excellent organization skills.
- Experience in change management.
- Strong decision-making skills.
- Experience with SMT and CNC machines.
- Basic soldering skills.
- Results driven
- Attention to detail
- Problem solver

Culture & perks

- A full-time permanent role, starting ASAP.
- Attractive salary package.
- A working environment designed to be diverse and engaging.
- A culture of experimentation and creative freedom.
- Knowledge sharing and cross-training.
- Working with amazing people.
- Not two days will be the same.

Questions you will be asked are likely to include:

- How many years' experience do you have with project planning and scheduling?
- Do you have experience with inventory management?
- How many years' experience do you have as a production manager?
